Obstetric Hemorrhage

AIM Obstetric Hemorrhage Snapshot

- 1) Your Facility _____
- 2) Your Email _____
- 3) Date of Snapshot _____
- 4) Does your facility utilize simulation, including reflective debriefs, to educate staff on obstetric hemorrhage? **YES NO**
- 5) Has your facility established a system in your hospital to perform regular formal debriefs after cases with major complications? **YES NO**
- 6) Has your facility established a process to perform multidisciplinary systems-level reviews on all cases of severe maternal morbidity (including women admitted to the ICU or receiving ≥ 4 units RBC transfusions)? **YES NO**
- 7) Does your facility have OB hemorrhage supplies readily available, typically in a cart or mobile box? **YES NO**
- 8) Does your facility have an OB hemorrhage policy and procedure (reviewed and updated in the last 2-3 years) that:
 - Provides a unit-standard approach using a stage-based management plan with checklists
 - Ensures availability to OB hemorrhage supplies at all times**YES NO**
- 9) Has your facility integrated some of the recommended OB Hemorrhage bundle processes (i.e. order sets, tracking tools) into your hospital's Electronic Health Record system? **YES NO**
- 10) Has your facility developed OB specific resources and protocols to support patients, family and staff through major OB complications? **YES NO**
- 11) Does your hospital ensure that every patient has contact with her baby as soon as she is alert and medically stable (contact may include: video call, bringing baby to bedside, taking mom to baby, providing photographs, etc.)? **YES NO**
- 12) Does your hospital assess every patient's desire to begin breastfeeding and/or pumping as soon as she is medically stable, regardless of inpatient unit (e.g., ICU)? **YES NO**

Obstetric Hemorrhage

13) Does your hospital address the emotional trauma of the event with every patient by normalizing emotional symptoms and providing resources for assisting both patient and family, including the offer of a consult with social work/psychologist/chaplain/etc. prior to discharge, when available? **YES NO**

14) Does your hospital ensure that every patient receives thorough discharge education (including, for example, information on: postpartum hemorrhage, hysterectomy, addressing iron deficiency, blood loss, and trauma)? **YES NO**

15) Does your hospital offer every patient and family a post-discharge debrief following a hemorrhage event (debrief should address, for example: estimated blood loss, amount of blood patient received, hemorrhage severity/classification, time/line narrative of event and interventions provided, review of the medical record)? **YES NO**

16) How many OB drills (In Situ and/or Sim Lab) were performed on your unit in this quarter for any maternal safety topic? _____

17) What topics were covered in the OB drills this quarter?

18) What cumulative percent of OB physicians and midwives have completed an education program on hemorrhage (within the last 2 years) that includes teaching on the Hemorrhage bundle and the unit-standard protocol? Report estimate in 10% increments (round up) _____ %

19) What cumulative percent of OB nurses have completed an education program on hemorrhage (within the last 2 years) that includes teaching on the Hemorrhage bundle and the unit-standard protocol? Report estimate in 10% increments (round up) _____ %

20) What percent of women who gave birth during this quarter had a hemorrhage risk assessment recorded in the medical record prior to giving birth? Report estimate in 10% increments (round up) _____ %

21) What percent of women who gave birth had formal measurement of cumulative blood loss from the time they gave birth through the recovery period recorded in the medical record during this quarter? Report estimate in 10% increments (round up) _____ %

22) How many total units of red blood cells were transfused in the previous three months for a patient who experienced a post-partum hemorrhage? _____

23) April 2017: Deliveries _____

24) April 2017: Number of Women Receiving Blood Transfusions _____

PERINATAL QUALITY COLLABORATIVE OF NORTH CAROLINA
Obstetric Hemorrhage

25) April 2017: Number of Units Transfused _____

26) May 2017: Deliveries _____

27) May 2017: Number of Women Receiving Blood Transfusions _____

28) May 2017: Number of Units Transfused _____

29) June 2017: Deliveries _____

30) June 2017: Number of Women Receiving Blood Transfusions _____

31) June 2017: Number of Units Transfused _____
