

## PQCNC Obstetric Hemorrhage

### Data Dictionary for Monthly Data Submission

The purpose of the Data Dictionary is to develop consistency in data entry. The Data Dictionary refers to elements visible when the reporting forms are printed.

The inclusion criteria for this data collection set is all women of 20 weeks gestation or greater during the initial delivery and post-partum recovery period. Hospital readmissions after the initial post partum recovery period should not be included.

### Monthly Data Submission

- 1. Deliveries:** the total number of women who deliver greater than 20 weeks gestation. Include stillbirths and miscarriages after 20 weeks gestation.
- 2. Number of women receiving blood transfusions:** the number of women who receive one or more units of packed red blood cells during the initial post-partum recovery period regardless of unit location.
- 3. Number of units transfused:** total number of units of packed red blood cells transfused to any woman during the initial post-partum recovery period (from time of birth until hospital discharge) regardless of unit location.
