

INSTRUCTIONS: how to export from SAMHSA Treatment Location and import into a custom map on Google Maps

FIND the closest methadone clinic in your area.

Note that methadone is provided at certified “Opioid Treatment Programs.”

- Open the SAMHSA mapping tool [<https://findtreatment.samhsa.gov/locator>]
- Enter your zip code
- Check the box for Distance and enter the search radius (eg. 5 miles)
- Check the box for “Substance Use (SU)”
- Click the small arrow next to “Substance Use (SU)” to display additional search options
- Under “Type of Opioid Treatment”, Check the box for SAMHSA-certified Opioid Treatment Program
- You may consider narrowing your search further by checking boxes for specific payment types (eg. Medicaid) or specific patient populations

CREATE a custom, easily accessible and sharable map

- Click the Download button below Find Facility and above Facility Listing Information
- Check the box that says “Include Services Information”
- Click Okay to download the data file onto your computer
- Go to Google Maps (www.google.com/maps/)
- Within the sidebar menu, select Your Places
- Select the tab that says Maps
- Click Create Map
- Change the name of the first layer to “Opioid Treatment Program (Methadone)”
- Click Import
- Select the file of SAMHSA Opioid Treatment Programs that you downloaded onto your computer
- Check the latitude and longitude boxes when prompted
- Check the name box when prompted
- You should now have the SAMHSA-certified Opioid Treatment Programs plotted onto your own custom Google Map

Example of a custom Google Map w/ SAMHSA Opioid Treatment Programs (methadone):
