

## Perinatal Quality Collaborative of North Carolina

## CMOP Work Plan 2015

**Year One Goal:** Create and strengthen a multidisciplinary hospital based community focused on providing a standardized approach to diagnosis and management of patients with hypertension in pregnancy. Utilizing the comprehensive CMOP Action Plan, participants will work on transforming practice in 5 areas to improve the care experience of preeclampsia patients and their families by 30-September 2015.

- 1) Building a ***strong perinatal quality improvement team (PQIT)*** to lead the work, ensure administrative buy-in, engage physicians and staff, and communicate the work
- 2) Ensuring ***proper diagnosis*** with accurate measurement of blood pressure, proper definition of the disorder, and early ID of severe features
- 3) Ensuring ***proper management*** with administration of antenatal steroids, control/treatment of blood pressure within 60 minutes and reducing deliveries prior to 37 weeks
- 4) Ensuring ***proper discharge*** by implementing a standard discharge regimen, postpartum education, and identifying post-partum complications
- 5) Incorporating the ***voice of patients and families*** by selecting and studying a care experience to transform
