

RAISE YOUR HAND IF YOU WANT TO HAVE A C-SECTION!

Or just come to the hospital before you're in labor. Recent studies have shown that pregnant women who come to the hospital before they are in labor have a **1-in-3** chance of getting a C-section. Whereas women who wait have only a 1-in-10 chance. Do yourself, and your baby, a favor: stay home until you're in labor!
