

## Labor Induction

**Risks/benefits discussed and consent obtained:**  Yes  No

**Induction method:**  Pitocin  Cervidil  Misoprostol  Foley bulb

**Gestational age:** \_\_\_\_ weeks \_\_\_\_ days

Confirmed by ultrasound  $\leq 20$  weeks:  Yes  No

Lung maturity confirmed by amnio:  Yes  No  Not applicable

### Indication:

- Diabetes  IUGR  Oligohydramnios  
 Postdates ( $\geq 41$  weeks)  PROM  Preeclampsia  
 Other \_\_\_\_\_

### FHR status:

- Category I (All present: normal baseline, normal variability, no late or variable decelerations)  
 Category II  
 Category III (absent variability with late or variable decelerations; or sinusoidal pattern)

**Tachysystole** (> 5 contractions/10 minutes):  Yes  No

**Cervix:** \_\_\_\_ dilation \_\_\_\_ effacement position:  posterior  mid  anterior  
\_\_\_\_ station (-3 to +3) consistency:  firm  medium  soft

**Bishop score:** \_\_\_\_ ( $\leq 7$ , consider cervical ripening)

**Estimated fetal weight :**  SGA  
 AGA  
 LGA
